

ROUNDCode

Code. Compete. Grow Together.

Private coding and skill-development platform for society members

What is ROUNDCode?

ROUNDCode is a member-only platform that turns weekly coding practice into a structured, transparent community programme. It combines coding challenges, verified evaluation, ratings, leaderboards and developer profiles in one place for Round Table DTU.

01

Build consistency

A fixed Problem of the Week creates a predictable weekly learning rhythm.

02

Measure progress

Scores, ratings, streaks and heatmaps make participation visible.

03

Improve quality

Members submit code, complexity analysis and proof links; admins review fairly.

04

Strengthen community

Profiles, posts, badges and standings encourage healthy competition.

Core outcome: a fair, motivating and auditable system that helps society members practise regularly while building a credible technical identity.

Who uses it?

Members

Solve challenges, track ratings and showcase skills.

Admins

Publish challenges and review members and submissions.

Super Admin

Manage administration and audited rating changes.

MEMBER EXPERIENCE

How the weekly cycle works

1. Register

DTU verification and approval

2. Discover

Open the active POTW

3. Solve

Easy, Medium and Hard

4. Submit

Code, complexity and proof

5. Grow

Score, feedback and badges

Important features

Member dashboard

Rating, rank, current challenge, deadline timer, submission status and activity heatmap.

Code workspace

A focused editor for submitting solutions with language and complexity details.

Developer profile

Bio, branch, batch, skills, coding handles, projects and portfolio links.

Progress and recognition

Rating history, streaks, achievements and badges such as First Step and Perfect 6.

Leaderboards

Weekly, monthly and all-time standings with podium highlights.

Community layer

Posts, notifications, rules and a member directory.

POTW scoring model

Problem	Maximum	Evaluation focus
Easy	1.0 point	Correct solution and fundamental approach
Medium	2.0 points	Reasoning and efficient implementation
Hard	3.0 points	Advanced problem solving and optimality

Maximum weekly score: 6.0 points. Partial credit can be awarded in 0.5-point increments.

Rules that make the system reliable

Area	Platform rule	Why it matters
Access	Only verified @dtu.ac.in addresses can register; personal email is used for login.	Keeps the platform focused on the intended society community.
Challenge	One active POTW contains one Easy, one Medium and one Hard problem.	Everyone receives the same clear target.
Deadline	All three problems share a firm deadline; late submissions are rejected.	Preserves equal opportunity and discipline.
Submission	All three answers are submitted together and then locked.	Prevents editing after submission.
Evaluation	Admins review solutions, complexity and evidence and can reopen with authority.	Combines feedback with a controlled workflow.
Rating	Scores increase ratings; missing a POTW costs 2.0 points, with a floor of zero.	Rewards consistent participation.
Governance	Super Admin manages admin roles and important actions are recorded.	Protects the integrity of standings.

Future enhancements

The platform can grow from a society-level coding community into a broader, interactive learning ecosystem.

01**Code runner within the website**

Run code with test cases and output validation inside the platform.

02**Scale for the entire college**

Expand access to departments, clubs and the wider college community.

03**Live contests**

Timed contests with live rankings and performance analysis.

04**1 v 1 matchmaking**

Match members with comparable ratings for head-to-head rounds.

05**More technologies beyond DSA**

Add web, app development, ML, cybersecurity, cloud and more.

06**Progress tracker and built-in AI support**

Personalised paths, recommendations, hints and an AI mentor.

Long-term vision: a complete college-wide platform where students learn, compete, collaborate and track technical growth.

MEETING PRESENTATION

Suggested live demonstration

1. Show login and explain the DTU-only registration gateway.
2. Open the dashboard: rating, rank, current POTW and deadline.
3. Show the POTW workspace, three difficulty levels and submission details.
4. Show the leaderboard and member profile with skills, projects and badges.
5. Show the admin hub: registrations, reviews, POTW management and activity.
6. Close with transparent scoring, locked submissions and accountable administration.

Value to Round Table DTU

For members

Regular practice, feedback, motivation and measurable growth.

For the society

A shared technical culture and visible learning programme.

For leadership

Clear governance, participation visibility and fair evaluation.

ROUNDCode brings together: weekly practice, healthy competition, transparent evaluation, public recognition and a roadmap for future technical learning.
